General Notes

1. VELUX recommends protecting all skylight openings and skylights in accordance with OSHA fall protection regulations. VELUX offers skylight fall protection accessories that are tested to withstand a minimum 400 pound static load. VELUX recommends that the building owner or manager restrict roof access only to personnel who have been sufficiently cautioned as to the location of skylights, advised that there exists a risk of falling through the skylights, and warned not to climb, step or walk on the skylights. Building owner or manager should provisions fall protection around skylight(s). In accordance with OSHA regulations.

2. This drawing emphasizes the VELUX CG2/CT2 Special Dome Skylight. It illustrates a general arrangement layout (plus recommendations) for a VELUX CG2/CT2 installation in a 0-90 degree roof pitch application. The CG2/CT2 skylight installs directly on site-built or prefabricated curbs.

3. The architectural/structural design and specifications for the inclusion of a commercial skylight, such as the VELUX CG2/CT2, in any roof/ceiling application is determined and provided by others. The design criteria includes, but is not limited to: design loads, structural configurations, structural framing member sizes and material, architectural finishes and integration with the roofing/ceiling systems of the building. VELUX recommends compliance by all designers and installers with all local and industry specific building code and guidelines. VELUX assumes no responsibility or liability for the design, construction and performance of a building structure by others.

4. Model CG2 Frame is in neutral grey powder coat finish. Model CT2 Frame is mill finish.
