**General Notes**

1. VELUX recommends protecting all skylight openings and skylights in accordance with OSHA fall protection regulations. VELUX offers skylight fall protection accessories that are tested to withstand a minimum 400 pound static load. VELUX recommends that the building owner or manager restrict roof access only to personnel who have been sufficiently cautioned as to the location of skylights, advised that there exists a risk of falling through the skylights, and warned not to step or walk on the skylights. Building owner or manager should provide fall protection around skylight(s) in accordance with OSHA regulations.

2. This drawing illustrates the VELUX CDI/CTI Special Dome Skylight. It illustrates a general arrangement layout (plus recommendations) for a VELUX CDI/CTI Installation in a 0-60 degree roof pitch application. The CDI/CTI skylight is flexible for use with standard and prefabricated curbs.

3. The architectural/structural design and specifications for the inclusion of a commercial skylight, such as the VELUX CDI/CTI, in any roofing/ceiling application is determined and provided by others. The design criteria includes, but is not limited to design loads, structural configurations, structural framing member sizes and material, architectural finishes and integration with the roofing/ceiling systems of the building. VELUX recommends compliance by all owners and installers with all local and industry specific building codes and guidelines. VELUX assumes no responsibility or liability in the design, construction and performance of a building structure by others.

4. Model CD1 Frame is neutral grey powder coat finish. Model CT1 Frame is mill finish.
