

ROOF WINDOWS
AND SKYLIGHTS

ZIL INSECT SCREEN

For VELUX Roof Windows

PROTECTION
AGAINST INSECTS.

DESCRIPTION:

- Retractable insect screen
- Upper section in anodised aluminum
- Mesh material: Nylon
- Mesh size: .06 in x .07 in
- Mesh Color: Grey
- Lateral sections in anodised aluminum

OPERATION:

Closing: when the screen is pushed down fully it automatically clicks into the lock.
Opening: by lightly pushing the handle the screen automatically retracts.

SIZE REQUIREMENTS:

The insect screen is secured to the interior edge of the opening. The size of the insect screen is therefore determined by the dimensions of the opening to be covered with the screen. Consult the table for the maximum dimensions. The width of the screen cannot be altered, but its height can be shortened if required. The insect screen keeps insects out and also allows you to open the window for extra ventilation.

A and **B** indicate the maximum opening covered by the appropriate insect screen. The surface that parts **C**, **D** and **E** are secured to should be at least 2 inches wide.

Size code for insect screen	Suitable for window no. *	Max. dimensions in inch. of the opening to be covered [A x B]	
		A	B
101	101 (9)	19 3/4	X 63
104	104 (6)	19 3/4	X 78 3/4
304	304 (1)	28 3/4	X 90 1/2
206	206 (5)	25 3/4	X 78 3/4
308	308 (2)	28 3/4	X 94 1/2
606	606 (4)	43	X 78 3/4
804	804 (7)	50 3/4	X 94 1/2
410	410 (3)	35 1/8	X 94 1/2
808	808 (8)	50 3/4	X 94 1/2

* If the external finish on both sides is not perpendicular to the window, a wider insect screen than indicated in the table should be fitted.
